CSIR expertise clinches judgement in murder case6

Modelling and analysis strengthen crime prevention and justice system8

Understanding the trio robbery crimes through spatial analysis10

••• DETECTION AND PROTECTION THROUGH OUR ARMED FORCES

South African radar knowledge used in support of the acquisition of Gripens for the SAAF.....12

Collaborative radar technology development programme reaches important milestone.....13

Ensuring optimal handling of the Gripen aircraft14

Gripen fighter aircraft to benefit from desktop tactical simulation tool16

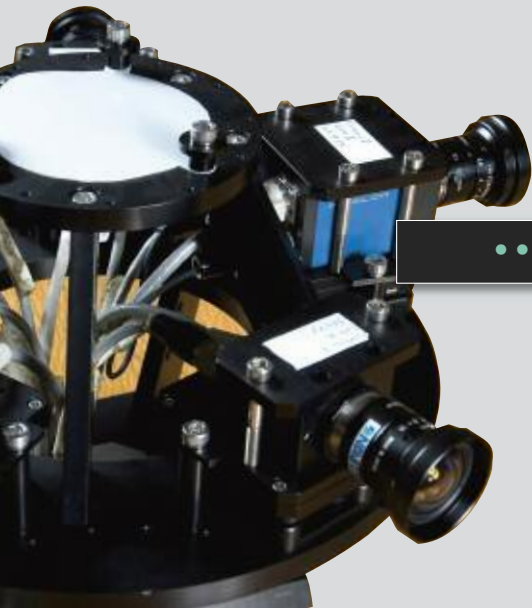

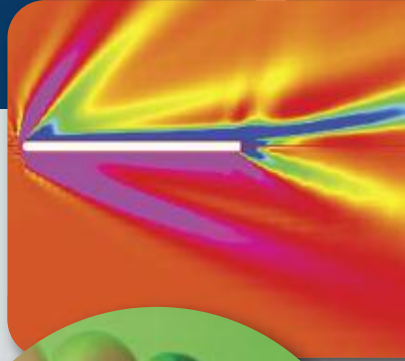

Making the most of the fifth-generation missiles of SA's newly acquired Gripens.....18

CSIR-designed flutter-flight test equipment to be used as SA jets prepare to carry new stores20

TENTIS

Developing knowledge for weapons integration on aircraft	22
Knowledge base on gas turbine technology a prerequisite for cost saving and safety of air force jets	24
World-class research infrastructure contributes to safe and secure South Africa	26
Pulling g's – the science of acceleration	28
Flying unpiloted in the conflict zone and into civilian territory	29
Developing a national unmanned aircraft system research infrastructure	30
New camera system redefines 'being on the lookout'	32
Securing stable images in rough seas	34
The science of deception	36
Development of young scientists ensures continued landmine protection validation and certification	39
Prismatic mirror and improved mortar set-up technique	40
Soldiers find way in harsh terrain with new digital technology	41
Nurturing a knowledge base to counter the threat of explosive remnants of war.....	42
Finding ways to lighten a soldier's load	44
A safe FIFA World Cup through interoperability.....	45
South African Army operators experience reality in simulation.....	46
Creating a geospatial atlas of disease intelligence and countermeasures.....	46

••• INFORMATION SECURITY

Building a strong local information security competence	48
Twisted light used in information security systems	51
