

# Hand Washing Dispenser

The CSIR-developed hand washing dispenser provides low-income households with a cheap, simple-to-use and hygienic source of water for washing hands.

The dispenser limits water flow to levels sufficient to complete the hand washing process. The hand washing dispenser is ideal for remote rural areas where water is a scarce resource.

## Advantages of this technology:

Hygienic dispensing of hand washing water

- ✔ Promotes good health
- ✔ Limits water wastage (some 30 washes per 2 litre)
- ✔ Easy to assemble and operate
- ✔ Low maintenance
