## **SECTION A – TECHNICAL INFORMATION**

### **1 INTRODUCTION**

The Council for Scientific and Industrial Research (CSIR) is one of the leading scientific research and technology development organisations in Africa. In partnership with national and international research and technology institutions, CSIR undertakes directed and multidisciplinary research and technology innovation that contributes to the improvement of the quality of life of South Africans. The CSIR's main site is in Pretoria while it is represented in other provinces of South Africa through regional offices.

### **2 BACKGROUND**

The project “Development of a Business Case: Insects for Aquaculture” is the third phase of the Agro-biotech project between the CSIR and the Department of Rural Development and Land Reform (DRDLR). The current phase aims at completing two tasks. The first task concerns breeding of the mealworm insect to scale whereas the second task concerns using the mealworms to anchor fish feeding trials on project sites in Mpumalanga (Acornhoek), Limpopo (Mphanama and Driehoek) as well as Gauteng (Hekpoort). The ultimate aim in the fourth phase is to create a small enterprise that produces alternative fish feed based on sustainable insect protein resources and two more enterprises each dealing specifically with breeding fish fingerlings (for supply to fish farms) and fish farming for the local market.

During this phase the selected community co-operatives must demonstrate ability to breed fish (tilapia and catfish) as well the insect protein resource (mealworm) at a pilot scale.

### **3 INVITATION FOR PROPOSAL**

Proposals are hereby invited for the provision of aquatic veterinary services for insect based fish feeding trials in Gauteng, Limpopo and Mpumalanga. The CSIR wishes to appoint a suitable service provider that will conduct these fish feeding trials, providing scientific input into the project whilst working with project beneficiaries in the four sites.
