SECTION A – TECHNICAL INFORMATION

1 INTRODUCTION

The Council for Scientific and Industrial Research (CSIR) is one of the leading scientific research and technology development organisations in Africa. In partnership with national and international research and technology institutions, CSIR undertakes directed and multidisciplinary research and technology innovation that contributes to the improvement of the quality of life of South Africans. The CSIR's main site is in Pretoria while it is represented in other provinces of South Africa through regional offices.

The National Integrated Cyber-Infrastructure System (NICIS) is responsible to provide integrated Cyber-Infrastructure in the form of a high-speed network, large scale processing capacity and long term data storage system to the research community in South Africa. NICIS provides these services through the Centre for High Performance Computing (CHPC), SANReN and the Data Intensive Research Initiative of South Africa (DIRISA).

2 BACKGROUND

The South African National Research Network (SANReN) is a major research infrastructure initiative of the Department of Science and Innovation (DSI) that is tasked with providing broadband connectivity for research and education institutions in the country.

SANReN has a number of research and education institutions that are dependent on the Point-of-Presence (PoP) at the University of KwaZulu-Natal Pietermaritzburg (UKZN PMB) site. Recently the UKZN PMB PoP has been experiencing isolation. Whenever the two current circuits supporting it fail, the PoP becomes isolated, and all sites dependent on this PoP are also isolated i.e. a total of 11 sites. If only one of the links fail, then there is reduced capacity to the Pietermaritzburg Metropolitan network for the duration of the failure.

This RFP is to procure a dark fibre link between UKZN PMB to the Teraco data centre in Durban to increase network resiliency to the sites that are affected and capacity to the Pietermaritzburg Metropolitan network.

The CSIR has been issued with a Licence Exemption in terms of the regulations for Licence exemption as defined in the Electronic Communications (EC) Act no 36 of 2005, for the establishment of SANReN. This licence exemption entitles the CSIR to build and acquire its own communications infrastructure, or to lease connectivity and capacity from licensed telecommunications operators holding Electronic Communication Network Service (ECNS) licences issued in term of the EC Act.

This document describes the general terms and conditions to which all bidders must comply.

3 INVITATION FOR PROPOSAL

Proposals are hereby invited for the supply of a dark fibre link with maintenance and support as detailed in *Table 1* and schematically illustrated in *Diagram 1* below:
