SECTION A – TECHNICAL INFORMATION

1 INTRODUCTION

The Council for Scientific and Industrial Research (CSIR) is one of the leading scientific research and technology development organisations in Africa. In partnership with national and international research and technology institutions, CSIR undertakes directed and multidisciplinary research and technology innovation that contributes to the improvement of the quality of life of South Africans. The CSIR's main site is in Pretoria while it is represented in other provinces of South Africa through regional offices.

2 BACKGROUND

The Collaborative Program in Additive Manufacturing (CPAM) is the implementation program of the South African Additive Manufacturing Strategy, which was formally adopted by the Department of Science and Technology (the DST) in August 2016. The development of the strategy was commissioned by the DST in 2013, with the brief to develop an implementation framework to guide public and private sector investment in Additive Manufacturing (AM) research, development and innovation.

The strategy identified four main priority focus areas, this being:

- Qualification of AM parts for medical and aerospace applications
- Additive Manufacturing for Impact in the traditional manufacturing sectors
- New Additive Manufacturing materials and technologies
- SMME development and support

These four priority focus areas are supported through initiatives to address and build an:

- Enabling environment to support the Additive Manufacturing Value chain
- Support the development of an enabling Education system for Additive Manufacturing

To support the implementation of the strategy, the CSIR is managing the Collaborative Program in Additive Manufacturing (CPAM). This program has four focus areas, being the following:

- Qualification of metal AM for medical and aerospace applications
- Design for Additive Manufacturing
- Industrial application of Polymer Additive Manufacturing

- Industry Development programs

CPAM has been running since November 2014. Phase 1 of CPAM covered the 2014/15 to 2016/17 financial years, and the phase 2 contract that was signed in November 2017 covers the 2017/18 to 2019/2020 financial years.

The CSIR plans to coordinate the submission of a new R&D plan for Phase 3 of CPAM to the DST. The submission process will cover a number of activities to ensure that the intent of the South African Additive Manufacturing Strategy is complied with, and secondly, that wide consultation is conducted to ensure that the 3rd Phase of CPAM also take into consideration inputs and requirements from the wider Additive Manufacturing community, including the private sector stakeholders, R&D and academic institutions as well as government line departments.

3 INVITATION FOR PROPOSAL

Proposals are hereby invited to facilitate a national workshop on the CPAM program, and to provide a comprehensive report with collated inputs, and proposed focus areas and themes that can be considered for the 3rd Phase of CPAM. This proposed focus areas and themes must be aligned with the recommendations of the SA Additive Manufacturing strategy, with motivations for any significant deviations from those articulated in the strategy

4 PROPOSAL SPECIFICATION

The anticipated CPAM national workshop is planned for 4 November 2019. The workshop will happen in Bloemfontein, as pre-cursor to the RAPDASA International Conference in AM. The CSIR will coordinate arrangements for the event, and distribute invitations through its networks as well as through the network of RAPDASA. The event will be a one day event. The proposed format for this facilitated workshop can include:

- Scene setting
- A presentation review of the AM strategy;
- A presentation review of the CPAM program design, objectives and achievements ;
- A briefing from the DST on process and inputs to be considered;
- An open and facilitated work session to gather inputs from the stakeholders.

Upon the conclusion of the workshop, a final report with recommendations from the AM stakeholder community should be made available to the CSIR within 2 weeks for review, with finalisation of the report completed 3 weeks after the workshop.

Key outputs expected

- A planning session with the CSIR on the approach to be adopted. The outputs will be in the form a planning report to be delivered to the CSIR one month before the event.
