SECTION A – TECHNICAL INFORMATION

1 INTRODUCTION

The Council for Scientific and Industrial Research (CSIR) is one of the leading scientific research and technology development organisations in Africa. In partnership with national and international research and technology institutions, CSIR undertakes directed and multidisciplinary research and technology innovation that contributes to the improvement of the quality of life of South Africans. The CSIR's main site is in Pretoria while it is represented in other provinces of South Africa through regional offices.

2 BACKGROUND

The Biomanufacturing Impact Area falls under the Future Production: Chemicals Cluster in the Division for Advanced Chemistry and Life Sciences. The Bioprocess Development Research Group has developed a novel multi-strain probiotic for use in broiler production. The safety, and efficacy of the probiotic has been previously determined. To prepare the technology for commercialisation, the production technology has been scaled up to manufacturing scale (200 L). A final efficacy trial in a controlled environment, is required to validate product performance in a field trial.

3 INVITATION FOR PROPOSAL

Proposals are hereby invited for the provision of services to the CSIR to conduct a field trial using actual broilers in a replicated trial design.

This will require current knowledge of ethical considerations, broiler microbiome testing, animal trial design, integration of probiotic into feed, animal testing, availability of a registered veterinarian, and their associated animal rearing requirements under GLP conditions.

The bidder must also be the actual person that will be providing the service on site.

4 PROPOSAL SPECIFICATION

All proposals are to be submitted in a format specified in this enquiry. However, tenderers are welcome to submit additional / alternative proposals over and above the originally specified format.

The required animal testing services will require substantial as well as recent / up-to-date experience as follows:

- 1) Substantial and recent proficiency with animal testing, in particular broiler testing
- 2) Demonstrate ability to conduct animal testing in an ethical manner
 - a. Determine the minimum number of birds required to be used in trial to determine statistical significance
 - b. Provide ethical clearance certificate from a registered animal ethics clearance committee
 - c. Conduct trial in a registered animal testing facility
 - d. Be able to conduct replicate trial design using required number of animals, 15 randomised blocks
 - e. Contain as part of the technical team a registered veterinarian
 - f. Indicate trial facility set up to include water fountains and feeders for the respective number of birds.
- 3) Demonstrate ability to produce, supply and use feed containing two probiotic treatments (Treatment 1 – positive control containing Clostat Dry, Kemin, South Africa and Treatment 2, CSIR probiotic, Pretoria) supplemented to final concentration of 1×10^9 CFU.mL⁻¹. These probiotics product will be supplied by the CSIR to the successful bidder.
- 4) Indicate the ability, skills, and proficiency levels of technical team to be used to conduct the trial
- 5) Demonstrate the ability of the team to conduct microbial analysis of the jejunum and ileum of the birds at specified time points and post-mortem
- 6) Ability to determine the performance of the probiotic product in terms of broiler performance and microbial composition analysis:
 - a. average daily body weight gain,
 - b. feed conversion ratio,
 - c. disease proliferation / not,
 - d. pathological findings,
 - e. microbial load comparison
- 7) Demonstrate ability to conduct post-mortems and incinerations

Over and above the basic animal testing conditions, the team must be able to provide a comprehensive technical report detailing trial results.

It is expected that the trial would be performed for a period of 33 to 35 days in total and the bid must be for this number of hours. The CSIR technical team needs to be able to come to the site of the animal testing facility as & when required.

Proposals should include all costs and fees. Proposals should include a CV of the responsible individuals conducting the trial as well as the veterinarian who will be providing the services, which should indicate the relevant qualification and experience information, as well as references. Examples of similar projects completed by the trial leader/manager who will be providing the services are to also be included in the proposal. The requirement is for the services of a senior team leader with direct, hands-on experience of similar animal testing approaches and this must be explained / motivated in the bid documents. Ethical approval certificate must be included in the proposal.
