2 QUOTATION REQUIREMENTS

The system must have a winch to aid in the deployment and retrieval of the instruments and equipment. The instruments and equipment may range from heavy grabs for sediment collection to buoys and associated anchor systems for long-term measurements. The system must be able to deploy and retrieve instruments and equipment safely to a depth of 100 m.
 5. The supplier should be able to provide an experienced deckhand to assist with survey work. However, the deckhand will not be required for all surveys.
 6. The vessel is required to have inboard motors to allow deployment of equipment from the stern.
 7. The vessel stern must be open to allow the deployment of equipment from the stern (some equipment will be deployed by sliding off the vessel stern).
 8. Mandatory requirement: The vessel must have a current SAMSA seaworthy certificate, the skipper must have a current SAMSA license appropriate for the vessel, night rating, a current radio license.
- 2.3. Service providers are to provide details of the vessel/s, including photos (which in turn should include winch systems and so on), SAMSA certificates and licenses etc, in the quote along with the above information. The CSIR reserves the right to inspect the vessel/s for suitability prior to identifying a suitable supplier. Such inspections will be at the expense of the CSIR.
