## SECTION A – TECHNICAL INFORMATION

### 1 INTRODUCTION

The Council for Scientific and Industrial Research (CSIR) is one of Africa's leading scientific research and technology development organisations. In partnership with national and international research and technology institutions, CSIR undertakes directed and multidisciplinary research and technology innovation that contributes to improving the quality of life of South Africans. The CSIR's main site is in Pretoria while represented in other South Africa provinces through regional offices.

### 2 BACKGROUND

The CSIR requires service providers' services to support and maintain our existing Avaya, Check Point, Hewlett Packard (HP) and Aruba network and network security equipment for a period of two (2) years.

Some of the equipment is no longer supported by the Original Equipment Manufacturer (OEM).

**Note:** Due to the peculiarities of maintaining and supporting equipment no longer supported by the relevant OEM, the CSIR may select multiple service providers.

Bidders, therefore, may but are not required to submit a bid to support and maintain the equipment of all the OEMs specified in this RFP. However, for any one of the OEM's, the bid must include support and maintenance of all that OEM's equipment at the CSIR.

The CSIR further seeks to make specific provision for service providers that can supply replacement equipment, whether new or refurbished, even if the service provider cannot provide any further support.

The CSIR requires the above services at all CSIR offices. The CSIR's offices are in Pretoria, Paardefontein, Kloppersbos, Johannesburg, Durban, Port Elizabeth, Cape Town and Stellenbosch.

### 3 INVITATION FOR PROPOSAL

This RFP seeks proposals from qualified service providers to provide the following services:

3.1 Two (2) years maintenance (including swap out) and support across all technology layers, ensuring availability, security, and operability for the CSIR's existing Avaya, Check Point and Aruba equipment as specified in **Table 1**,

3.2 **Table 3** and

3.3 **Table 2**.

- Maintenance requires 24x7x4hrs to respond, on-site and telephonic support and includes swapping out of equipment. The CSIR requires equipment, not supported by the OEM anymore, to be supported and maintained by the Bidder.
- Support includes software assurance (the supply, installation and commissioning of the latest software and firmware versions where possible).
- Availability, security, and operability must be across all technology layers and OEMs products and include the liaison and cooperation with other service providers to achieve overall network and network security availability, security, and operability.
